

Send a Message to the Governor...

His Special Interests *are not* California's Interests

Governor Schwarzenegger has vowed to continue his all-out assault on retirement security...both in the Legislature and by drafting another ballot measure.

While continuing his attacks on nurses, teachers, firefighters, police and other public employees, the Governor's done nothing to strengthen education, cure our ailing health care system, improve transportation, or fund other vital services.

Instead, he's pushing an agenda that benefits the special interest campaign contributors who have helped him raise more political money than any Governor in history... all while he persists in planning a special election that will cost taxpayers \$70 million.

Arnold Schwarzenegger is not fighting the special interests...he's fighting children, seniors, workers, and families...he's fighting us!
